- Certified Safety Advance Escape has been certified and tested to the highest international safety standards at both cellular and battery level: UL1642, UN38.3

### WHY LITHIUM ION FERROUS PHOSPHATE (LiFePO<sub>4</sub>)

- · The safest of all the known lithium ion technologies globally
- Smaller than any other commercial size battery type
- · Less than half the weight of a lead-acid battery
- Wider temperature range and higher temperature
- · Higher cycle life than any other commercial sized battery
- Ultra low self discharge makes it ideal for intermittent use
- LiFePO<sub>4</sub> is the most robust chemistry under extreme conditions
- Environmentally friendly: LiFePO<sub>4</sub> batteries have no poisonous or harmful substances, whether in production or in use.
- Best direct replacement for deep cycle duty.
